To Whom It May Concern:

Let me begin by stating that one of the best decisions for my family that I have made was buying a Kinetico Water System.

When I moved last year to Argyle, Texas from Flower Mound, Texas....one of the first things I noticed was our water was HARD and it never left my clothes clean, then our skin got really dry, and then we noticed the water coming out of our faucets was brown looking. I am saying all this because my goal was just to buy a filter for our drinking water, but when they came to test our water and we saw what it was doing to our clothes, our water pipes, our skin.....I was sold on the entire water softener system to save our house plumbing and save money on my soap products. This alone will pay for the system itself. We also bought our filter for our drinking water, and it's the best water we have drank in a long time! We were spending about \$50.00 on our bottled water; we save \$50.00 a month now, and pay for our entire system!

Again the installation, the service, and our educators "sales team" were the best!

Thank you Shelton for educating us in healthy water, and clean water for our bodies!
