Bob.

Just a quick line to thank you one more time for you to encourage me to change my water system to a new process from that of what I have been using in the past 30 years. It was always a chore to keep the salt flowing and maintenance from time to time. You will recall I had two systems over that time. However since the installation of my new system The Kinetics non electric softener has been wonderful. In fact I have not even put salt replacement over the time of purchase. My wife is very happy to have such soft water.

Thanks again I am certainly very satisfied not only with your equipment but also with your staff over the years in giving me professional care.
